

# SLIP, TRIP, & FALL PREVENTION: ROD STICKMAN VIDEO DISCUSSION

## VIDEO ACCESS

<https://youtu.be/zolaiLNtJZM>

If you have received a copy of the Slip, Trip, and Fall Prevention Package, the full video will also be included there.

You can also do a quick online search for “Rod Stickman Slips Falls”

## BACKGROUND INFORMATION

As you watch this video, think of ways you can work with your employees to create a workplace environment that eliminates the risks of slips, trips and falls. You may wish to encourage them to discuss incidents or near misses, what could have been done to prevent them, and what’s being done now to prevent reoccurrences.

## DISCUSSION QUESTIONS

1. What kinds of things could make someone slip, trip, or fall in our workplace?
2. How can we prevent slips and falls in our workplace?
3. What are some of the areas in our workplace that present a high risk for falls? (this may include trucks/trailers, wet/icy/muddy steps, slippery work areas, worn/heavy traffic areas, and ramps/loading locks)
4. How can we prevent someone from falling in these areas?

*This video and discussion questions were developed by Work Safe for Life from WCB of Nova Scotia.
