

QR CODE ACTIVITY

A fun way to find answers to important safety

Overview

Participants will find the answers to the questions provided by simply using a device to scan the QR Code and follow to the website attached. The website the QR Code takes you to will include the answers to the questions.

Instructions

1. This activity can be completed individually or in small groups. Each individual or group requires access to a QR Code Scanning capable device, so small groups may be required.
2. Prior to beginning, ensure each group has access to a QR Code reader. These can be found on most smart phones.
 - ◆ iPhones—use phone camera to scan the QR code directly
 - ◆ Android—download a free QR Scanner from the Play Store (one option is “Lightning QR”)
3. Provide each participant (even if working in groups) with the *QR Code Activity Work Sheet*.
4. There are three categories, each with a separate QR Code and information. Groups should complete all three categories (scan the QR Code, review the information, fill in the answers on their work sheet). Categories include Slips, Trips and Falls; Safety Lingo; and Emergency Preparedness.
5. Once complete, bring the groups/individuals back together to discuss.

Variation

For less reading/writing and more discussion, you can assign each group/individual with only one of the topics. When the groups come together at the end, they can discuss each category (with those who read about it being the experts and “teaching” the other groups).

Discussion Questions

- ◆ What is one thing you learned that you did not know before? How will it change the way you act (at work, at home, etc.). Will you tell someone else about this new information?
- ◆ Why is understanding risks (such as slips, trips, and falls) important to preventing injuries?
- ◆ Where is emergency preparedness important?
 - ◆ (Answer: everywhere! Emphasize that this is not only for the workplace, also for school, home, etc.)
- ◆ Is there any other “SAFETY LINGO” you don't know? Where do you think you could find that information?
 - ◆ (Safety information can be found many places, including online, in a safety training session, by contacting the SHSA, or by asking someone who knows, such as a teacher, a

QR CODE ACTIVITY WORKSHEET

SCAN THE QR CODES BELOW TO FIND THE ANSWERS TO THE QUESTIONS PROVIDED.

Slips, Trips & Falls

Why is Slip, Trip and Fall prevention important?

What can you do to prevent falls in the workplace?

BONUS: Have you ever slipped, tripped, or fell? Has it ever happened at work?

Name:

Page 1 of 3

QR CODE ACTIVITY WORKSHEET

SCAN THE QR CODES BELOW TO FIND THE ANSWERS TO THE QUESTIONS PROVIDED.

Safety Lingo

What is a Hazard?

What is Personal Protective Equipment (PPE)?

What is Proper Training?

Emergency Preparedness

What is the first thing you should do if you need to evacuate (leave) the building?

Where are the two nearest exits to you RIGHT NOW?

When is it safe to come back into a building after an evacuation?
