

INSTRUCTIONS:

Choose a scenario and interview a classmate to demonstrate how to properly refuse unsafe work and why.

SCENARIO 1:

You were recently hired at a roofing company. You were tasked to replace the shingles on a two story house. You notice the scaffold is wobbly and the platform is worn out but you don't say anything because you're new and the other workers continue to use it.

SCENARIO 2:

You're a dishwasher at a restaurant. It is a busy night and the spray bottles need to be refilled so tables could be cleaned to seat more customers. The manager asks you to quickly fill the spray bottles. You've never filled the spray bottles before and are unsure what to use or how much chemical is required. The manager tells you the colour of the chemical bottles you need to use, to mix with water and to be quick as the tables need to be cleaned.
