Introducing the HSLC: Hospitality Stream

**EXPERTS IN YOUR INDUSTRY
COMING TOGETHER TO GIVE YOU
THE BEST QUALITY PRODUCT.**

STEC provides education and training to help strengthen Saskatchewan's tourism and hospitality sector.

In partnership with STEC, The HSLC: Hospitality Stream provides efficiencies and risk-specific training options for joint customers in the hospitality industry.

We are proud to partner with Service Hospitality to promote their HSLC Program. Their team of highly experienced, professional safety advisors will guide you through the program and help you gain the knowledge and skills you need to improve health and safety in your workplace.

- Kari Burgess
Workforce Development Consultant, STEC

Helping your Hospitality Organization Achieve Health and Safety Excellence

Workplace injuries and their associated costs can have a negative impact on an organization's financial health, productivity, and culture. We are here to help!

Helping hospitality organizations achieve the highest standard for safety certification!

WHAT is the HSLC program?

HSLC is the national standard for health and safety leadership with four levels of certification. We provide the guidance you need to create a system that controls hazards and prevents injuries. Each level contains required training plus electives to build your safety management system based on your organization's individual needs.

WHO is the HSLC: Hospitality Stream for?

If you are a hospitality employer in the province of Saskatchewan, you have legislative obligations. The larger the employer you are, the greater the obligation. Our HSLC program guarantees you will meet these obligations and MORE!

HSLC is customized to fit your needs now more than ever!

Your organization will work with one dedicated Safety Advisor through the lifetime of your HSLC journey to ensure you are given the attention and expertise you need. All training and consultations are offered in-person or virtually, on your schedule, and in a private setting to facilitate open dialogue with your employees.

The only safety certification program in Canada to include Claims Management training.

Our HSLC program is proven to decrease WCB and injury-related costs in your workplace. Our comprehensive Claims Management course will help you prepare so that, in the case of an injury, you can ensure a smooth transition through medical appointments, modified work, into the return to full duties.

HOW do we participate in HSLC?

The HSLC program is designed to prepare your organization to create and manage the most important components of your Safety Management System. Through consultation, evaluations and training, we make sure that your safety management system is not just a dusty pile of documents – but a complete, effective system. Progressing through each level of HSLC, your organization will achieve increased recognition and improved health and safety processes.

Certification reduces injuries, reduces costs and saves lives.
